

South Nottinghamshire Integrated Care Partnership

Arnold and Calverton Primary Care Network

The Calverton Practice | Highcroft Surgery | Stenhouse Medical Centre

“Reducing health inequality through partnership and innovation”

Our priorities

Workforce development

Our vision is to work together in supporting general practice whilst improving primary care through relationships, collaboration, and innovation. We will build increased workforce resilience by developing new working practices, including enhancing digital working, fostering special interests, and development of skill mix.

Patient care

We will work to improve pathways for our care home population and vulnerable patients. We want to support care home staff by standardising visits, understanding training requirements, and ensuring consistent relationships between care homes and practices. We want to work with community teams to ensure the most appropriate help is offered to patients.
