

South Nottinghamshire Integrated Care Partnership

Nottingham West PCN: Stapleford neighbourhood

Hickings Lane Medical Centre | Linden Medical Group | Saxon Cross Surgery

Population:
21,336 patients

“Developing strong, resilient general practice to meet the needs of our local population”

Our priorities

Understanding our local community assets

We want to work with our social prescribing team to identify and understand our local community assets to assist us in delivering a personalised care approach. We hope this will help us to build relationships with our community, work sustainably and promote integration of our local services.

Engaging our local community

We want to engage our local community and encourage them to participate in shaping the future development of our neighbourhood.

▼ Unless otherwise stated, comparisons are to England averages. Source: Notts CC 2019

High proportion of people aged 65 and over

High rate of hospital admission for self-harm

High rate of unemployment, including long-term

High fuel poverty
